JUNIOR/INTERMEDIATE

Class #1 – Western Boots

Placing: 2-4-1-3

Cuts: 3-1-3

Reasoning:

I placed this class of Western Boots 2-4-1-3.

Mike needs a new pair of boots for dancing, stock shows, and other special events. He wants something nice but not too flashy. He has \$275 to spend.

I started the class with Boot #2, the Ariat Square Toe Boots in Weathered Buckskin. Of the four choices, I felt this boot fulfilled all of Mike's criteria, as it is \$240 for the pair, which is under his budget, it's fashionable but not too flashy, and it's made very well. I'm aware that it costs more than the pair of boots I placed in 2nd, but I felt it met the criteria better as Boot #4's style is very flashy.

I placed 4 over 1 because #4 is more of a fashion boot, good for dancing and special events, and #1 is a work boot. The rubber sole on the work boot would make dancing difficult. I grant that #1 cost substantially less, but it doesn't meet Mike's needs.

I placed 1 over 3 because of price. While the #3 boot met Mike's requirements better, it was almost \$100 over his price range, therefore automatically making it the last choice for the class.

Therefore, I placed this class of Western Boots 2-4-1-3.

JUNIOR/INTERMEDIATE

Class #2 – Fast Food

Placing: 2-3-1-4

Cuts: 2-1-4

Reasoning:

I placed this class of fast food 2-3-1-4. Janice needs a breakfast that is low in sodium and high in protein.

Based on that criteria, I started the class with #2, the Panera Power Breakfast. It has the lowest amount of sodium and the 2nd highest amount of protein. Additionally, it has the fewest calories and lowest fat content of all the options.

My middle pair was a close pair. I placed 3 over 1 because 3 has lower sodium and no meat, which is Janice's preference. I grant that 1 has less calories and fat, but the sodium level was higher and it has meat therefore placing it third.

In the bottom pair, I placed 1 over 4 because 1 has lower sodium, fat & calorie content than 4. I grant that 4 has the most protein in the class, but the high levels of sodium, fat, calories, and the beef (which Janice doesn't like) prevent it from being able to place anywhere but last in class.

Therefore, I placed this class of Fast Food 2-3-1-4.

JUNIOR/INTERMEDIATE

Class #3 – Televisions

Placing: 1-4-2-3

Cuts: 4-1-4

Reasoning:

In the top pair, I placed 1 over 4 because 1 was a television with 32" LED panel, built in DVD Player for students to watch movies, 1920x1080 Full HD resolution and wall mountable. 1 is also easy to use and doesn't require any floor space. Whereas, 4 has a 32" LCD panel, USB Port, and 1366X 768 resolution. 4 isn't an easy use because of the USB Port and it has lower resolution.

In the middle pair, I placed 4 over 2 because 4 was a television with a 32" LCD panel, USB Port for students to watch movies, 1366X 768 resolution, and HDMI Inputs 3 and doesn't require any floor space, whereas 2 has lower resolution of 1280X 720, only has HDMI Inputs 2, and 2 doesn't have a Built-in DVD player or USB Port for the student to watch movies.

In my bottom pair, I placed 2 over 3 because 2 was a television with 32" LCD panel, 1280x720, HDMI Inputs 2, and wall mountable. Whereas, 3 was a television has a 40" LCD panel which is too larger for the classroom, not wall mountable and the cost is \$299.00.

I placed 3 last because it was not within the \$250.00 budget, the television is 40" , not wall mountable in which this television would require floor space and doesn't have a built-in DVD Player or USB Port for the students to watch movies.

Therefore, I placed this class 1-4-2-3.

JUNIOR/INTERMEDIATE

Class #4 - Computers

Placing: 2-1-4-3

Cuts: 2-4-3

Reasoning:

I placed this class of computers 2-1-4-3.

In the top pair, I placed 2 over 1 because it had a bigger processor at 1.86 GHz (vs 1 GHz) and more hard drive memory at 64GB (vs 16GB). Number 2 also weighed less at 1.2 lbs and 2.4 as a notebook whereas 1 was 1.32 lbs and notebook size of 2.77; not much but would make a little difference when carrying it around campus. 2 was a tablet and notebook which is easy to use and take with him but also would not take up much space in the dorm.

In my middle pair, 1 over 4 because it was a tablet and a notebook whereas 4 was a desktop and not really suitable for being portable. 1 also did not require a power cord to plug in and gave the most battery life in the class at 12 hours. Product 1 also had double the hard drive memory over 4 at 16GB. It also weighed considerably less at 1.32lbs as a tablet vs 10.6 lbs. I do criticize that 1 has less hard drive power then 1 but grant that it is has the best resolution at 1920x1200.

In my bottom pair, I placed 4 over 3 because although I criticize that 4 is a desktop and not easily portable and you have to plug it in for power, I grant that it is within the budget. Product 4 does also have a great resolution at 1920x1080 and one of the best in the class.

I placed 3 last because it was not within the \$500 budget and did not have a great resolution, half the battery life as product number 1 and 2 (6 hours), and weighed the most out of the portable notebooks and tablets. I do grant that it has the largest hard drive memory.

Therefore, I placed this class 2-1-4-3.

JUNIOR/INTERMEDIATE

Class #5 – Cookware - Reasons

Placing: 1-4-2-3

Cuts: 2-2-5

Reasoning:

I placed this class of Cookware 1-4-2-3. Mr. Hoffmann needs a new set of pots and pans that are low maintenance, durable, and user friendly. The set needs to have 3 pot sizes and 2 skillets, with matching lids. His budget is \$225.

I started the class with set #1 because it most closely matched Mr. Hoffmann's criteria. It has the proper number of pots & pans, with lids. Its non-stick coating makes it easy to cook with, and the hard-anodized aluminum makes it easy to care for and durable. It also has a free lifetime warranty, which will be beneficial if a piece breaks. It is also less expensive than number 4, which placed 2nd in the class due to price and the material the set is constructed of. Copper requires much more attention to remain in good working condition and can be more difficult for beginners to cook with.

In the middle pair, I placed 4 over 2 because 4 is a higher quality and meets the required number of pots and pans. While I grant that 2 is much cheaper, I question the quality of a 32 piece set for only \$34. Poor quality would result in Mr. Hoffmann having to purchase another set of pots and pans, costing him more money, thus 4 placing over 2.

In the bottom pair, I placed 2 over 3. You get more items with 2. Again though, I question the product quality. While I concede that 3 is by far a product of higher quality and durability, it is out of Mr. Hoffmann's price range, making it an automatic last.

Therefore, I placed this class of cookware 1-4-2-3.

JUNIOR/INTERMEDIATE

Class #6 - Mystery – Headphones

Placing: 3-2-1-4

Cuts: 2-3-4

Reasoning:

I placed this class of headphones 3-2-1-4.

In my top pair I placed 3 over 2 because 3 was the least expensive, it was a universal wireless headphone, and it was foldable to provide convenient storage. It did happen to also be pink which was one of Jamie's favorite colors.

In my middle pair I placed 2 over 1 because it was wireless. I do criticize it was not her favorite color and at the top of her price range but grant that it was wireless made for an iPod.

In my bottom pair I placed 1 over 4 because it was in the price range but criticize it was a wired headphone.

I placed 4 last because although it was purple it was out of the \$30 price range and it was a wired headphone.

Therefore I placed this class 3-2-1-4.

SENIOR

Class #1 – Western Boots

Placing: 2-4-1-3

Cuts: 3-1-3

Reasoning:

I placed this class of Western Boots 2-4-1-3.

Mike needs a new pair of boots for dancing, stock shows, and other special events. He wants something nice but not too flashy. He has \$275 to spend.

I started the class with Boot #2, the Ariat Square Toe Boots in Weathered Buckskin. Of the four choices, I felt this boot fulfilled all of Mike's criteria, as it is \$240 for the pair, which is under his budget, it's fashionable but not too flashy, and it's made very well. I'm aware that it costs more than the pair of boots I placed in 2nd, but I felt it met the criteria better as Boot #4's style is very flashy.

I placed 4 over 1 because #4 is more of a fashion boot, good for dancing and special events, and #1 is a work boot. The rubber sole on the work boot would make dancing difficult. I grant that #1 cost substantially less, but it doesn't meet Mike's needs.

I placed 1 over 3 because of price. While the #3 boot met Mike's requirements better, it was almost \$100 over his price range, therefore automatically making it the last choice for the class.

Therefore, I placed this class of Western Boots 2-4-1-3.

SENIOR

Class #2 – Fast Food

Placing: 2-3-1-4

Cuts: 4-1-4

Reasoning:

I placed this class of fast food 2-3-1-4.

Janice needs a breakfast that is low in sodium, high in protein, and limited in carbohydrates.

Based on that criteria, I started the class with #2, the Panera Power Breakfast. It has the lowest amount of sodium & carbohydrates, and the 2nd highest amount of protein. Additionally, it has the fewest calories and lowest fat content of all the options. I do criticize that it costs significantly more than the other options but based on Janice's wants and needs, it is still the clear favorite.

My middle pair was a close pair. I placed 3 over 1 because 3 has lower sodium and no meat, which is Janice's preference. I grant that 1 has less calories and fat, but the sodium level was higher and it has meat therefore I am placing it third.

In the bottom pair, I placed 1 over 4 because 1 has lower sodium, fat & calorie content than 4. I grant that 4 has the most protein in the class, but the high levels of sodium, fat, calories, and carbs and the beef (which Janice doesn't like) prevent it from being able to place anywhere but last in the class.

Therefore, I placed this class of Fast Food 2-3-1-4.

SENIOR

Class #3 – Outdoor Equipment - Reasons

Placing: 3-4-1-2

Cuts: 3-4-5

Reasoning:

This class of sleeping bags is placed 3-4-1-2.

3 is an obvious pick for the top because it is in the price range and is synthetic which is hypo allergenic, and has the coldest temperature rating.

In the middle pair, 4 is picked over 1 because it is still within the price range, has a comfortable temperature rating with synthetic insulation; granted 1 is within the price range and the same temperature as 4, but we criticize the size of the sleeping bag as well as the it was made of down and contains allergens which he may be allergic too.

We close out the class with an obvious bottom pair due to the price and unappealing temperature rate and overall size of the sleeping bag.

Therefore this class of sleeping bags is placed 3-4-1-2.

SENIOR

Class #4 – Computers

Placing: 2-1-3-4

Cuts: 2-3-4

Reasoning:

I placed this class of computers 2-1-3-4.

In the top pair, I placed 2 over 1 because 2 had a biggest processor at 1.86 GHz (vs 1 GHz) and more hard drive memory at 64GB (vs 16GB). Number 2 also weighed less at 1.2 lbs and 2.4 as a notebook whereas 1 was 1.32 lbs and notebook size of 2.77; not much but would make a little difference when carrying it around campus. Number 2 also had a better RAM memory at 3 GB. It was a tablet and notebook which is easy to use and take with him but also would not take up much space in the dorm.

In my middle pair, 1 over 3 because it was a tablet and a notebook whereas 3 was a notebook only which he was not wanting and not as easily portable. I do criticize that product 1 did not have the hard drive memory like product 3 but I grant that 1 had the best resolution (1920x1200) and the longest battery life.

In my bottom pair, I placed 3 over 4 because product 3 has the best hard drive memory and was a notebook. I do criticize that it did not have the resolution like number 4 and had ½ the power of hours (6 hours) of 1 and 2 in battery life but I grant that it has the best RAM memory (4 GB). It also weighed less than the desktop, product 4.

I placed 4 last because it was a desktop and not suitable for carrying to class and was over the budget at \$600.

Therefore, I placed this class 2-1-3-4.

SENIOR

Class #5 – Printers – Reasons

Placing: 4-1-2-3

Cuts: 2-3-5

Reasoning:

I placed this class of printers 4-1-2-3

In the top pair, I placed 4 over 1 because 4 was less expensive of all the printers (\$268.88), it had the best print speeds at 38 ppm and 9.6/9/1 in laser photos, had the best fax speed dial storage and same paper memory. It did have a 30 pg auto document feeder. Product #4 had capabilities to print from her iPhone to the printer.

In the middle pair, I placed 1 over 2 because 1 was less expensive at \$324.99 vs \$529.99. It was had a better print speed of 38 vs 32/31. I do criticize it did not have the speed dial storage memory but had more page memory and a better scan of 4800 dpi vs 2400 dpi. Product 1 also had an app that would be able to print from her iPhone to her printer.

In my bottom pair, I placed 2 over 3 because 2 had did have a fax machine and auto document feeder. I do criticize that 3 had a better price, print speed, and scanner print quality but I grant that 2 did have a fax machine which was required for her business and she did not have to have an account to print pictures.

I placed 3 last because it did not have a fax machine which she needed and required an account to print photos wirelessly.

Therefore, I placed this class 4-1-2-3.

SENIOR

Class #6 - Mystery – Finger Paints

Placing: 3-2-1-4

Cuts: 2-2-3

Reasoning:

I placed this class of finger paints 3-2-1-4. Amy has three kids that love to finger paint, so quantity is important. She also wants something that isn't too messy, is washable, and can be used on other materials besides just paper.

I started the class with number 3, the Crayola Washable Finger paints because it had the highest total number of ounces and was the least expensive per ounce. It also most closely matches Amy's requirements since it is washable and comes with EZ Squeeze/No Spill tubes to prevent messes. It also had the highest number of stars on the customer reviews at 4.5 of 5. While I grant that number 2, the BAZIC Washable Finger paint, has more color selections, the price per ounce and customer reviews kept it firmly in second place.

In the middle pair, I placed 2, the BAZIC Washable Finger paint, over 1, the Melissa & Doug Finger paint Set because the BAZIC set was much less expensive per ounce, had more of a variety of colors at 6, and received a higher number of stars in the Customer Review. Based on the reviews, I grant that the Melissa & Doug set may be more washable, but the consistency & quality issues, as well as the pricing, prevented that set from moving up any higher in the class.

In my bottom pair, I placed 1 over 4 because 1 was less expensive per ounce and contained more total ounces. Number 4, the Crayola Color Wonder Finger paint, was an obvious bottom because it is the most expensive per ounce, only had 5 total ounces, and can only be used on special paper or it won't show up. While I grant that 4 had a higher average number of stars at 3.6 of 5 and isn't as messy as normal finger paint, the high price landed it in last place.

Therefore, I placed this class of finger paints 3-2-1-4.

Fast Food

Janice likes to eat breakfast but usually doesn't have time to grab something at home, so she eats out a lot. Her doctor has told her that she must decrease her sodium intake, eat more protein, and limit her carbohydrate intake to take 150 grams per day (about 45 grams per meal). Janice doesn't really like meat, especially beef, but she'll tolerate chicken or turkey. Given Janice's circumstances, which breakfast would be the best choice?

Outdoor Equipment

Buster has joined the local 4-H Natural Resource Club. For his first trip he will be attending a campout at the local state park in January and will need a sleeping bag. His budget only allows for a \$75 purchase. Buster has a lot of allergies and tends to be sensitive to most fabric and is also normal height. Which sleeping bag is the best choice for Buster?

Printers

Susan runs her own business as a cake decorator and baker. She is looking for a printer for her business that she can print and scan photos of her cakes to show clients as well as fax invoices to clients. She also loves Pinterest and wants to be able to look up cake decorating ideas and print them from her iPhone. Please help her find a printer that will best suit her and her business.

Mystery – Finger Paints

Amy has 3 kids between the ages of 2 and 7. They LOVE to finger paint, and they use it on all different kinds of projects, not just paper. Amy likes to keep their artwork and display it in the house. Because the kids can be messy, she wants to make sure she gets finger paints that are washable and easy to clean-up but that are still fun for the kids. Which finger paint should Amy get?

<p>#1 Melissa & Doug Finger paint Set</p> 	<p>#2 BAZIC Washable Finger paint</p> 	<p>#3 Crayola Washable Finger paints</p> 	<p>#4 Crayola Color Wonder Finger paint</p> 
<p><i>General Features</i> Includes: 4 colors (red, blue, yellow, & green) Ounces: 9 total ounces of paint Details: Plastic jars with wide, easy-grip, screw-on lids. Non-toxic, washable paint.</p> <p><i>Customer Reviews</i> Positive: "These are highly washable." Negative: "Weird & goopy. Like fingerpainting with warm jello."</p> <p>Total Stars: 3 of 5</p>	<p><i>General Features</i> Includes: 6 colors (red, blue, yellow, green, purple, & orange) Ounces: 9 total ounces of paint Details: Washable, Can be safely used on almost any surface such as construction, poster and drawing paper</p> <p><i>Customer Reviews</i> Positive: "This washable finger paint does everything it advertises; I just thought it would last longer than one project. There wasn't as much paint as I thought." Negative: "It was fun to use it, but it took long for painting to dry also."</p> <p>Total Stars: 3.5 of 5</p>	<p><i>General Features</i> Includes: 4 colors (red, blue, yellow, & green) Ounces: 16 total ounces of paint Details: Washable, comes in EZ Squeeze-No Spill tubes with a flip cap to prevent messes</p> <p><i>Customer Reviews</i> Positive: "This paint is great! It cleans up easily and the containers are pretty mess free. The paint also goes a long way!" Negative: "My batch had a really weird smell."</p> <p>Total Stars: 4.5 of 5</p>	<p><i>General Features</i> Includes: 5 colors (red, blue, yellow, orange & green) Ounces: 5 total ounces of paint Details: There's no need to worry about accidents and messes on carpets, furniture, or walls. The finger paint is a clear, fast-drying gel that appears as a color only when applied to Color Wonder Paper. This kit includes 12 sheets of double-wide Color Wonder Paper. This smooth, easy-to-apply finger paint comes in red, orange, yellow, green, and blue.</p> <p><i>Customer Reviews</i> Positive: "I love that it doesn't make a mess all over my house!" Negative: "Because it only works on the special paper, you can't use it on anything else. And since it's clear, the kids don't really know how much they are using."</p> <p>Total Stars: 3.6 of 5</p>
<p>Price: \$6.99</p>	<p>Price: \$4.49</p>	<p>Price: \$6.95</p>	<p>Price: \$7.97</p>
