The Texas Chapter of The Wildlife Society invites high school students to the best week of their summer! The 22nd annual Wildlife Conservation Camp will be held July 26-August 1, 2015 at the Texas Tech University Center in Junction, Texas. High school students that have completed the 9th-12th grades can apply at www.wildlifecamp.tx.org and applications are due May 1st.

Campers will experience hands-on activities led by wildlife professionals, which include wildlife and plant identification, hunting as a management tool, species diversity, conservation ethics, wildlife capture and survey techniques, wildlife tracking, predator-prey dynamics, white-tailed deer management, fishing, hunter safety, shooting skills, and much more. The week-long camp is especially recommended for high school students who are considering a career in wildlife management or natural sciences. Students will develop an appreciation for the outdoors through a priceless experience that they will carry with them forever.

The Texas Tech University Center offers on-site lodging and dining facilities located on the banks of the South Llano River. The Center and Llano River Field Station boast a plethora of native wildlife, including mammals, reptiles, amphibians and birds. Campers will have the opportunity to view and study these animals.

The camp fee is \$300 which covers lodging, meals, materials, and transportation during camp. Contact your local Farm Bureau for possible sponsorships.

Apply online at www.wildlifecamp.tx.org. For additional information contact Stephen Ross, 2015 Camp Director, at wildlifecampdirector@yahoo.com or 361-364-2643.
